PROFESSIONAL SUMMARY

Passionate and motivated Computer Science graduate with a strong foundation in Python, SQL, Data Analytics and Machine Learning. Adept at problem-solving and analytical thinking, with a keen interest in developing efficient, scalable solutions. Strong foundation in data analysis, visualization, problem-solving, and extracting actionable insights from data. Eager to contribute to a dynamic organization while continuously learning and growing as a software professional.

SKILLS

- **Programming:** Python, C
- **Data Analytics:** SQL, Pandas, NumPy, Excel, Power BI, DAX
- **Data Visualization:** Power BI, Matplotlib
- **Machine Learning:** TensorFlow, Keras, PyTorch, XGBoost, SHAP
- **Core Computer Science:** Data Structures & Algorithms, Object-Oriented Programming (OOP)
- **Cloud:** Google Cloud Platform (IAM, GCS, BigQuery, Pub/Sub)
- **Tools:** Git, GitHub, VS Code

PROJECTS

- **UPI Fraud Detection System** May 2026
Tools: Python, XGBoost, TensorFlow, SHAP [GitHub](#)
 - Built a two-layer fraud detection system combining an Autoencoder and graph feature extraction with XGBoost fusion, achieving ROC-AUC 0.8358 and PR-AUC 0.4918 on heavily imbalanced data (3.5% fraud rate).
 - Implemented SHAP explainability for per-transaction fraud explanations and deployed the solution as an interactive Streamlit web app.
 - Identified and resolved data leakage in graph node features and applied a time-based train/test split to prevent temporal leakage.

- **Manufacturing Production Quality Dashboard** Aug 2026
Tools: Power BI, SQL, Python [GitHub](#)
 - Built an interactive Power BI dashboard to monitor production, quality, machine downtime, and plant performance.
 - Used SQL for production and operational analysis and Python for data generation and preprocessing.
 - Developed DAX KPIs and What-If simulations to evaluate production target achievement and operational impact.
 - Applied Key Influencers, Decomposition Tree, and interactive scorecards to identify quality issues and performance drivers.

- **Supply Chain & Delivery Performance Dashboard** Feb 2026
Tools: Power BI, DAX, Excel [GitHub](#)
 - Built a 5-page Power BI dashboard analyzing 10,999 shipments to evaluate delivery performance and operational efficiency.
 - Developed 15+ DAX measures including warehouse ranking, Revenue at Risk, and year-over-year comparisons using time intelligence.
 - Implemented drill-through pages, decomposition tree, What-If analysis, and conditional formatting scorecards.

EXPERIENCE

- **Femtosoft Technologies** May 2025 - June 2025
Trainee Intern - Python Fullstack Chennai
 - Developed a fully functional delivery website clone as part of internship implementation.
 - Designed pages for user registration, product listing, cart management, and order placement.
 - Ensured responsive UI, secure authentication, and user-friendly navigation across the platform.
 - Gained hands-on experience in web development and real-time issue debugging.
- **Deloitte Australia Data Analytics Job Simulation** Jan 2026
Forage - Online Remote
 - Completed a Deloitte data analytics job simulation involving data analysis and forensic technology.
 - Created a data dashboard using Tableau and used Excel to classify data and draw business conclusions.

EDUCATION

- **Bachelor of Engineering in Computer Science** *Nov 2022 - Apr 2026*
S. A. Engineering College
 - CGPA: 8.46
- **Higher Secondary in PCM** *June 2021 - May 2022*
St. Joseph's Matriculation Higher Secondary School
 - Percentage: 75%
- **Senior Secondary** *June 2019 - May 2020*
St. Joseph's Matriculation Higher Secondary School
 - Percentage: 97%

CERTIFICATIONS

- **Mepro Pearson Communication** 2024
- **NPTEL Database Management System** 2023
- **C, C++, Python - CSE Academy** 2022
